Innovation Eye Centre-Kisii Eye Hospital: At A Glance

Description

Our Business Model for Service and Social Transformation

Innovation Eye Centre is a social enterprise that offers high quality, affordable and accessible comprehensive world class eye care services to the community in South Western Region of Kenya and beyond.

Innovation Eye Centre is using an entrepreneurial approach to solve a social problem- avoidable blindness and visual impairment. We aim of create positive social impact through the restoration of sight and prevention of avoidable blindness. As we combine business discipline, medical skills and compassion we will ensure that ALL can receive high quality affordable eye care services irrespective of their social economic status.

Our Vision

“Eliminating Preventable Blindness”

Our Mission

“To Provide Affordable Quality Eye Care”

Our Core Values

Patient Centered, Quality, Compassion, Ethics, Innovation

Our purpose

To Deliver First Class Comprehensive Eye Care Services to All in order to “Improve Lives through Affordable Quality Eye Care”

CEO's Report and Highlights 2023

We had a very successful year in 2023 in many aspects. The year reported a steady rise in the number of patients that we served in the base hospital as well as outreach and vision Centres. We did the highest number of cataracts surgery in the year, [2,414] more than any other previous year since inception. Added to almost 900 other eye surgeries done, makes over 3,300 total surgeries that we did in 2023. This is the year that we opened our second Vision Centre in Ogembo town that has report a very encouraging success in its first year of operation. Our partnerships both locally and internationally have not only been maintained but also strengthened.

The Programmes with our key partners, the University of Michigan, Fred Hollows Foundation, Operation Eyesight Universal, Fiat Lux Foundation, the Aravind Eye Hospital, the Rwanda International Institute of Ophthalmology, and the University of Nairobi were maintained at the peak and that saw us able to perform our function of offering quality eye care to ALL in the community getting more strengthened. The Eye Foundation Nigeria started working more closely with us, especially in business support to enable expansion to Kisumu. We just completed the renovation and equipping of the Kisumu branch and hope to start the operations in the first quarter of 2024. This will see us bring our much sought after services closer to the population in Kisumu City and the surrounding counties that number over 4 million. Our new partner, the Vision Spring is working with us in a unique model to strengthen our ability to reach to the millions of the Uncorrected Refractive Errors in the community.

Our workforce has been amazing in working through great challenges to continue to offer very high standards of eye care. We have continued to internally train new members of the team both in administration and clinical areas to enable increase the much sought after human resource in eye health that is key to meet the huge eye care needs in our region. The testimonies from our patients on the quality of care received from our us is always very encouraging.

As we approach the year 2024 and beyond, we feel energized to expand our services and reach out to more. Key to this will be to operationalize our services in Kisumu City, create more vision Centres, and keep increasing a well-trained team of eye care staff. A region free of avoidable blindness is now becoming a reality.

Dr. Daniel Kiage
Founder/CEO
Innovation Eye Centre

Programmes and Projects

Fred Hollows Foundation - Community Outreach Cataract Surgery Programme

Innovation Eye Centre - Kisii Eye Hospital appreciates The Fred Hollows Foundation-Kenya for the support of 1,583 cataract surgeries that were performed through our outreach programme in the year 2023.
