Innovation Eye Centre Celebrates Nurses Week 2025

Innovation Eye Centre, Kisii Eye Hospital, joined the global nursing community in celebrating Nurses Week 2025 from 12th to 18th May, under the theme “Our Nurses. Our Future. The Economic Power of Care.” This annual celebration recognizes the vital contributions of nurses to healthcare systems and society at large.

At Innovation Eye Centre, we marked the week with heartfelt appreciation for the commitment, skill, and compassion our nurses bring to every patient interaction. Nurses are the backbone of our clinical services, and their role in eye health—ranging from patient education and clinical assessments to surgical support and post-operative care—cannot be overstated.

Innovation Eye Centre Participates in Free Medical Camp at Kisii University

Innovation Eye Centre participated in a successful free medical camp organized by Kisii University, in partnership with other health stakeholders from the region.

The medical camp, held at the university grounds, brought together several organizations including Kisii Teaching and Referral Hospital (KTRH), Equity Afya Medical Centre, the Kenya Red Cross, Dynapath Medical Laboratory, and Innovation Eye Centre - Kisii Eye. The initiative was aimed at increasing access to essential healthcare services for the local community.

Residents turned up in large numbers to benefit from free consultations, investigations, diagnoses, and treatments offered by the various medical teams present. As part of its commitment to community health and outreach, Innovation Eye Centre offered free eye checkups, vision assessments, and specialist consultations.

Innovation Eye Centre Extends Outreach to Underserved Communities in Fight Against Avoidable Blindness

In its continued mission to combat avoidable blindness, Innovation Eye Centre carried out a series of outreach programs across various regions during the month of May, bringing essential eye care services to underserved communities.

The initiative, aligned with the Centre's core objective of promoting equitable access to quality eye care, saw clinical teams travel to remote and marginalized areas where access to specialized medical services remains a challenge. The outreach activities included free eye screenings, vision assessments, diagnosis, referrals, and treatment for eye conditions such as cataracts, glaucoma, and refractive errors.

Innovation Eye Centre Leads Community Eye Health Training with Partners

Innovation Eye Centre, in collaboration with global partners Peek Vision and Operation Eyesight Universal (OEU), successfully conducted a comprehensive training program for its staff in Kisii and Community Health Promoters (CHPs) attached to the Keroka Vision Centre under the OEU Project 2025.

The training, which took place as part of the ongoing commitment to expand eye health services in the region, focused on strengthening the capacity of frontline health workers and clinical staff to deliver high-quality, accessible, and sustainable eye care services. The program covered essential areas such as community-based eye health screening, use of Peek technology for vision assessment, patient referral pathways, data collection, and reporting.
