

MAY 2026 NEWSLETTER

Advancing Glaucoma Research Through International Academic Partnership

Innovation Eye Centre was privileged to host Dr. Scott Harrod, a medical student from Harvard University, for a two-week academic and research attachment during May 2026.

During his stay, Dr. Harvard worked closely with our ophthalmology team, focusing on research related to glaucoma, one of the leading causes of irreversible blindness worldwide. His research activities involved observing clinical practices, reviewing patient care pathways, and studying patterns in glaucoma diagnosis and management among patients attending our facility.

Celebrating Our Nurses During Nurses Week 2026

At Innovation Eye Centre, we proudly joined the global community in celebrating Nurses Week 2026, which was observed from 6th to 12th May 2026. This special week provided an opportunity to recognize and appreciate the dedication, compassion, and professionalism of our nursing team, whose contributions are vital to the quality of care we provide every day.

Throughout the week, our nurses were honored for their unwavering commitment to patient care, their tireless efforts in supporting clinical excellence, and the kindness they show to every patient who walks through our doors.
